Let us walk you through the steps... from idea to installation

THE COLLECTION

Exhibit design starts with your collection. What is the nature and size of the objects on display? How will they be mounted? From what perspective will they be viewed? *We can help you create an exhibit as unique as the objects you have to display.*

LIGHTING

Proper lighting is critical to the success of an installation. What is the ambient lighting level within your space? Does natural light play a role? Will you light your exhibits externally or in-case? *We can make sure you are showing your collections in their best light.*

STYLE

Showcases play a role in the overall design of an exhibition. What is the overall style, exterior finish and interior decking color of the case? *We can help set the stage for telling your collection's story.*

ENVIRONMENTAL CONSIDERATIONS

Evaluating the environmental profile of your exhibit space and the sensitivity of your objects is key to

assessing special needs for your showcases. How effective is your HVAC system? Do you need to maintain a specific RH level? What are the visible and UV light levels in your space? What is the duration of the exhibit? *We can help you safely display your collection for years to come.*

SECURITY

Assessing your specific security needs ensures a safe exhibit. Are simple measures like screws and straps that attach to frames and vitrines adequate? Or do you require more robust keyed locking systems or discreet integrated pneumatic locks? *We can ensure your objects are secure.*

ACCESS & HANDLING

Establishing how you will handle your exhibited collection determines key case features. How often will you open the case? Do you need external access to silica gel to avoid unnecessary handling? Is a lift-off vitrine adequate or is a hinged door safer for you and your objects? *We can make maintaining and changing your exhibits easy.*

Comparison Chart

Finding your perfect showcase is easy—review key features of each series at a glance.

4

These top-of-the-line cases are perfect for special collections that require the highest level of protection. Glass cases offer durability that lasts for decades—the frameless, laminated float safety glass offers extra security and blocks harmful UV rays. Available with clear silicone adhesive gasketing that ensures minimal air exchange to preserve the environment inside the case, as well as your most valuable objects. The display deck is made of the highest quality archival materials and wrapped in Creation Baumann Ultra IV fabric for a stunning yet safe display. Cases secure with ABLOY® key locks. Choose from several styles available in standard and custom RAL base colors, to create the perfect exhibit.

Every Curator case is made to order, just for you!

6

When you don't want to sacrifice style for protection, these finely crafted cases are ideal for presenting a traveling exhibit or showcasing a long-term display. Every case is built solely with archival materials, from the laminate bases and powder-coated aluminum collars to the linen-wrapped Ethafoam® mounting decks, to offer a safe space for precious collections. The flawless hand-polished vitrines are available in standard or UV filtering acrylic for clarity and an extra level of care. Silicone gaskets for minimal air exchange and convenient built-in compartments for silica gel ensure an airtight, humidity-controlled environment. Cases secure with key locks, security screws or optional pneumatic locks. Available in 10 stunning styles that go anywhere to show off any item in your collections.

archival quality

8

These are the pedestal cases every exhibit space needs. A simple design ensures that they can go anywhere and display anything, and an array of pedestal finish options allows them to make a statement without distracting from your exhibit. An archival-quality deck and hand-polished acrylic vitrine, available with UV filtering, create a safe display area for your objects. Pedestals feature adjustable leveling feet for a solid base and vitrines secure with security screws. Choose from a diverse selection of sizes and pedestal styles available in hundreds of laminate finishes and paint colors, or select a primed base that you can paint yourself again and again to keep up with your ever-changing exhibits.

10

A sophisticated, minimalist appearance with a classic appeal makes these cases ideal for academic libraries, universities and special collections. Hand-polished vitrines are available in standard or UV-filtering acrylic and joined with PS 30 seams—the clearest seams possible—for a flawless appearance. An archival-quality deck ensures a safe display space that will not harm valuable collections. Lighted case styles feature adjustable, energy-efficient LED spotlights with an integrated kickplate switch. An optional double slant deck and acrylic covered, linen-lined display drawer in our larger Athena case helps create a truly unique display. Choose from several rich wood veneers to create a welcoming exhibit.

Reveal a natural warmth in your collections

Gaylord Archival Sedgwick™

As your exhibits evolve, so do our Sedgwick cases. The beautiful solid cherry of these display cases develops a rich patina with age for enduring style.

solid cherry

tempered glass

display quality

14

These cases are a dependable choice for rotating collections of books and artifacts in reading rooms—due to both their construction and unique selection of styles. An attractive cherry frame grows darker and richer with age, while a melamine deck, tempered glass, and brass locks and piano hinges provide a secure yet accessible home for exhibitions. Choose from more traditional case styles, or discover an exclusive offering of angled and multi-sided cases with optional, energy-efficient LED lighting.

Every Sedgwick case is made to order, just for you!

Imagine a case as unique as your collections

Gaylord® Archival Custom

Have you thought of something we haven't? Nearly every aspect of our exclusive, made-to-order cases can be customized to make sure you're getting exactly what you need to create the perfect exhibit. Whether it's a specific size, distinctive design or finish, environmental controls, extra security features—or something completely unique—our consultants can work with you to create a case that meets your special needs for highlighting a single object or an entire collection.

18

We can customize nearly any aspect of your case—just ask!

Consider just a few of your options:

DIMENSIONAL

- Overall case size
- Base shape, height and width
- Vitrine height
- Interior vitrine dimensions

DESIGN

- Case styling
- Case base color or finish
- Raised decking
- Decking material and color
- Built-in lighting

SECURITY

- Security screws
- Pneumatic locking systems
- Straps to bolt case to floor

ENVIRONMENTAL

- Inert, non-off-gassing archival-safe materials
- Built-in, externally accessible humidity control chambers
- Gasketed vitrines for minimal air exchange rate
- UV filtering acrylic or glass vitrines
- Space for an environmental generator
